Yulim (Jess) Choi

Los Angeles, CA | (213) 507-7154 | yulimcho@usc.edu | LinkedIn | Personal Website

EDUCATION

University of Southern California, Los Angeles, CA — Aug. 2026 – May 2028
Master of Science in Applied Data Science

Sungkyunkwan University (SKKU), Seoul, Korea — Feb. 2022 – Feb. 2026
Bachelor of Library and Information Science; Bachelor of Business Administration

- *GPA: 3.86/4.00 (Magna Cum Laude)*
- *Relevant Coursework:* Applied Machine Learning, Data Analytics, Data Curation

Indiana University, Kelley School of Business (IU), Bloomington, IN — Aug. 2024 – May 2025
Exchange Student

- *Relevant Coursework:* Business Analytics & Modeling, Data Design & Management

TECHNICAL SKILLS

- *Programming Languages:* Python, SQL, R
- *Tools:* pandas, NumPy, Matplotlib, Seaborn, scikit-learn, Jupyter Notebook, Firebase, REST API, Excel, Tableau
- *Skills:* Statistical Analysis, Exploratory Data Analysis, Machine Learning, Data Visualization

EXPERIENCE

Department of Library and Information Science, SKKU, Seoul, Korea — Oct. 2025 – Aug. 2026
Undergraduate Research Assistant

- Developed an end-to-end ECG processing pipeline that selected 72,468 eligible recordings; generated analysis-ready profiles for 35,980 unique subjects through data cleaning, quality control, feature engineering, and aggregation.
- Communicated analytical findings, methodological decisions, and data limitations through reports tailored to a cross-disciplinary faculty team.
- Built a Python preprocessing workflow for 56 full-text materials science papers in XML format, using section-level parsing, text normalization, and sentence segmentation to create a 4,622-sentence corpus for named entity recognition (NER).
- Developed an end-to-end literature-to-annotation pipeline integrating API-based retrieval, XML acquisition, text cleaning, sentence-level chunking, and NER pre-annotation to generate Doccano-ready JSONL files.

PROJECTS

Database Design for Operational Efficiency | Data Design & Management | SQL — Spring 2025

- Designed and normalized an apparel order-management database, translating ER diagrams into conceptual, logical, and physical schemas to ensure data integrity.
- Implemented the system in Oracle using DDL and DML, developing queries and stored procedures for operational reporting.

Passenger Congestion Prediction at Hyehwa Subway Station | Applied Machine Learning | Python — Fall 2023

- Integrated fragmented ridership datasets, engineered temporal and seasonal features, and trained KNN, linear regression, and random forest models to predict daily congestion.
- Visualized passenger flow patterns using Seaborn and Matplotlib to uncover peak congestion periods and seasonal variability.

LEADERSHIP EXPERIENCE

Hult Prize On Campus, SKKU, *Campus Director*, Seoul, Korea — Oct. 2023 – Mar. 2024

- Spearheaded SKKU's first-ever Hult Prize competition, engaging 76 applicants and advancing 13 finalist teams to address UN Sustainable Development Goals.
- Directed end-to-end program execution, including team recruitment, applicant screening, event promotion, mentoring, and coordination with mentors, judges, professors, World Vision Korea CFO, and startup CEO.
- Oversaw final competition logistics, budgeting, and communications with SKKU administration and Hult Prize HQ for seamless program delivery; organized intercollegiate networking events with 68 participants from 3 universities.
